Building Backyard Ice Rinks for over 30 years!

Supreme Sports Chicago is the Premier Ice Rink Builder in the Chicagoland area. Owner Joe Hiltz has built thousands of residential and commercial ice rinks and is celebrating over 30 years of backyard winter fun! Supreme Sports specializes in customizing a rink to fit your yard and budget. Here are some of the most frequently asked questions.

Q: What is the cost?

A: Rink pricing includes Wood boards, Nicerink brackets, Nicerink bumpers, disposable liner and installation. Costs start at \$2,850 for a 20' x 40' rink, and can go up to \$4,200 for a 40' x 72' rink. Containment netting is optional, at an additional cost.

Q: Does my yard need to be perfectly level?

A: No, most yards are not level. We shoot grades with a laser to determine the most level area.

Q: When is the best time to install the rink?

A: The framework needs to be installed in the ground, before the ground begins to freeze. Liners and flooding occurs when the temperatures drop to a consistent freezing point.

Q: What kind of maintenance is involved?

A: Treat the rink like you would your sidewalk and driveway; as soon as the snow stops, it needs to be shoveled. Keeping your rink shoveled and clean will ensure beautiful ice!

Q: What will this do to my grass?

A: Grass goes dormant in the fall. The liner actually will protect your grass from being saturated with moisture from the snow. In most cases it will be greener and healthier the following year.

Q: What happens when spring comes?

A: You will need to store the boards and brackets indoors for the following year. Most customers store it in their shed. The liner is recyclable.
